A pattern is a repeated use of lines, colors, or other elements. A familiar example is a repeated pattern of dots in a piece polka dotted cloth. Each dot is part of the pattern. Two-dimensional patterns are created by using a motive over and over again A

_____ is one complete unit in a larger design. A motif might be a simple flower-like design or a geometric shape in a fabric pattern.

In three-dimensional art, a module is one complete unit. A brick is one kind of _____ in a brick wall. Others might be columns on a building or cylinders made of clay or a row of sculptures. Patterns tend to _____ a work of art. When the motifs or modules are arranged in a regular pattern, the design is often called an all-over pattern.
